Comfort

Welcome to the water!

Would you like to live or “weekend” in a spacious luxury houseboat? Are you looking for a high-quality houseboat with excellent maneuvering characteristics that allows you to make unlimited trips to the most beautiful places on the water?

Then we have the solution for you: The AquaHome

The AquaHome is a houseboat, specifically designed for a carefree stay on inland waterways. With its excellent handling characteristics, the AquaHome adds another dimension to the concept of fun on the water in the broadest sense. The modern interior has been finished to a very high standard and guarantees a comfortable and unique liveaboard experience.

Your AquaHome!

Make an appointment and let yourself be surprised by the possibilities and extensive options that the AquaHome offers. Our team is ready to fulfill all your dreams and desires.

Excellent nautical properties:

The AquaHome is a catamaran, consisting of two hulls with the living area deck in between. The total area is 12 x 5 meters. The strong CE-D certified construction with a special polyester hull shape ensures stability and is designed to be able to perform at speed.

For propulsion, the AquaHome is fitted with 2 x 25 HP 4-stroke outboard engines as standard equipment (more horsepower is optional). The hulls contain the technical areas and the fresh and grey water tanks, accessible through self-draining hatches. Optionally, you can opt for a bow thruster and mooring poles, so that the AquaHome has optimal maneuvering characteristics and excellent mooring possibilities.

Design

The living area is fully insulated, winterproof and comfortable with construction from sustainable sandwich panels and anodized profiles. The living area is 4 x 9 meters, and the interior can (optionally) be customized to your own individual ideas.

AquaHome Comfort has a spacious living room with a comfortable seating area and an all-round view. A sliding door provides access to the spacious front deck. The open kitchen is equipped with the necessary built-in equipment. Two bedrooms offer no less than four sleeping places (master bedroom with a double bed and the second bedroom with a bunk bed (s)). The luxury bathroom is fully equipped with a spacious shower cubicle, toilet, washbasin with hot and cold running water and lots of storage space.

Options

The standard AquaHome Comfort can be upgraded with the following optional packages:

AquaHome Eco

This package offers a low environmental impact and many other options that improve the green footprint of your AquaHome: a sustainable and silent electric propulsion system that optimizes motoring comfort and solar panels that add to the available power capacity. Lithium-Ion batteries offer more potential such as hot water and/or electric cooking.

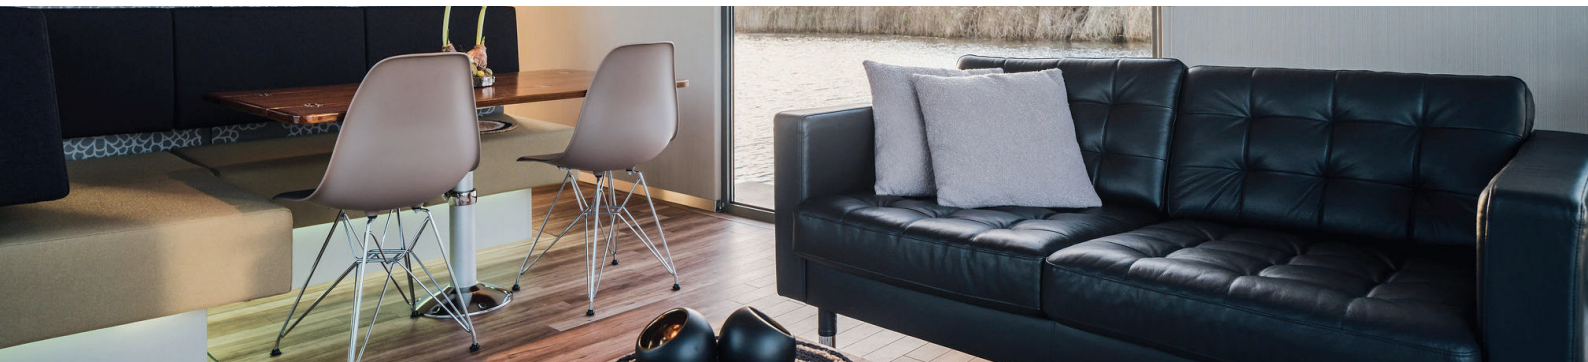

AquaHome Custom

Please inquire about the possibilities of us building your own “Custom” AquaHome. We’d love to work with you to build something very special.

Delivery

AquaHome Comfort is available using a unique building concept and is available to be containerized and economically shipped to any location worldwide for your own stay or rental. Financing is always available through us.
